2002 GOALS MEETING

The process has allowed an informal way to developing a set of general goals and guidelines that represent the overall direction of the City Council. Over the years, the process has evolved from a simple list of goals to a somewhat more detailed description of actual activity on projects. Ideally, the process will result in direction to staff that can be used in developing the budget, capital projects and other activities or projects.

During the past several months, a list of items for discussion at this meeting has been kept. These are listed below as a starting point for the discussion. At the end of the meeting, staff should be directed to compile the ideas, goals and projects into a Goals/Workplan report for your review and approval.
