

October 18, 2004

Honorable Mayor and Members of
the Hermosa Beach City Council

Regular Meeting of
October 26, 2004

**PROJECT NO. CIP 02-108 STREET IMPROVEMENTS – 2ND STREET BETWEEN
PACIFIC COAST HIGHWAY AND MONTEREY BOULEVARD BETWEEN
HERONDO STREET AND 4TH STREET – APPROVAL OF PLANS,
SPECIFICATIONS, AND ESTIMATES; ADVERTISE FOR BIDS**

Recommendation:

It is recommended that City Council:

1. Approve the plans, specifications, and estimate;
2. Authorize Staff to proceed and to advertise for bids; and
2. Authorize the City Clerk to post Notice Inviting Sealed Bids for said project.

Summary:

Project No. CIP 02-108 Street Improvements – 2nd Street between Pacific Coast Highway and Monterey Boulevard between Herondo Street and 4th Street is approved for Fiscal Year 2004-05. Staff requests that City Council approve the plans, specifications and advertising for bids.

The plans, specifications and estimate for this project have been approved by the Director of Public Works and are available in the Department of Public Works for review.

Background:

On August 13, 2002, City Council approved the Professional Services Agreement between the City and Advanced Applied Engineering, Inc. (AAE) for providing city traffic engineering and transportation planning services and authorized staff to negotiate and procure additional services by individual Task Order.

On January 09, 2003 Staff issued a Contract Task Order to AAE to provide surveying and civil engineering services for pavement rehabilitation, construction of curb and gutter, sidewalk, and drainage corrections for 2nd Street between Pacific Coast Highway and The Strand.

The scope of work includes pavement rehabilitation and construction of handicap access ramps, curbs & gutters, driveways, cross-gutters, and replacement of sidewalk panels. Pavement rehabilitation will consist of a combination of strategies, which will include crack and slurry sealing, milling and asphalt overlay, concrete and/or asphalt pavement spot repairs as well as the re-construction of the gutter section along both sides of Monterey Boulevard, re-construction of the intersections at 2nd Street and Monterey Blvd, 2nd Street and Manhattan Avenue, 2nd Street at Pacific Coast Highway, and 2nd Street between The Strand and Beach Drive. Work will also include the replacement of some of the existing curbs in 2nd Street and Monterey Boulevard with monolithic curb and gutters that will address drainage deficiencies and help prolong the life of the new pavement overlay. The re-construction of driveways will be included in those areas

where the curb and gutter is being replaced. The re-construction of the gutter sections on Monterey Boulevard will consist of the excavation and removal of the existing curb and non-monolithic 7.5' wide concrete gutter that were constructed circa 1923 and replacing it with new monolithic curb and gutter.

Public Notices were mailed out and a public hearing was held at the regular meeting of the Public Works Commission on October 20, 2004 to review the proposed project design.

The engineer's estimate is approximately \$347,055 and the duration of construction should be 45 working days.

Fiscal Impact:

No fiscal impact at this time.
