

September 2, 2004

Honorable Chairman and Members of the
Public Works Commission

Regular Meeting of
September 15, 2004

CITYWIDE SPEED ZONE SURVEY

Recommendation:

It is recommended that the Public Works Commission support the Citywide Speed Zone Survey with speed limit revisions and have staff forward same to the City Council for adoption.

Summary:

The City's Traffic Engineering Consultant, AAE, Inc., has completed the Citywide Speed Zone Survey. The City is required to perform this survey every five years and to maintain speed limit regulatory signage in conformance with this survey. The speed surveys have been completed and analyzed to determine the 85th percentile speeds. Accident history and other traffic factors were considered in recommending speed limit revisions. Our consultant will present the data and discuss recommended speed limit modifications. The next step will require formal adoption by the City Council.

Respectfully submitted,

Richard D. Morgan, P.E.
Director of Public Works/City Engineer
